SANY Skid Steer Loader

- Engine Power: 50.2 kW / 67.3 hp
- Bucket Capacity: 0.4 m³ / 0.5 yd³
- Rated Operating Capacity: 998 kg / 2,200 lb
- Operating Weight: 3,850 kg / 8,488 lb

SKID STEER LOADER

The skid steer loader is a versatile, compact and highly maneuverable small engineering vehicle capable of 360° in-place turning. Equipped with a quick-hitch, it enables efficient switching between various tools to meet the demands of diverse working environments. It is widely used in fields such as building construction, agriculture, municipal engineering, landscaping etc.

The SS210R skid steer loader is an all-new product developed based on thorough market research and extensive feedback addressing customer pain points. Leveraging SANY mature excavator R&D platform and stringent testing system, the model has undergone 3,000 hours of endurance testing for reliability verification. With its new digital and intelligent design, it offers six key features, providing customers with exceptional value.

SIX HIGHLIGHTS

Comfortable Operation

Safety Operation

Efficient Operation

Convenient Maintenance

Intelligent Control

Various Attachments

COMFORTABLE OPERATION

Spacious Cab

- The cab has an interior width of 950 mm, providing ample space and depth for a comfortable experience.

Low Noise

- Adopting an integrated cab with good sealing.
- The temperature-control fan with large diameter can dissipate heat independently, making low noise.

Work with Front Door Open

- The design features an upward-opening door, with the front door capable of flipping up to the top of the cab via a unique linkage mechanism, allowing for operation with the door open.

Air Conditioning System

- Integrated cooling and heating, powerful and comfortable.
- Wind speed and direction, foot blow and defrosting, adjustable as desired.

Touch Display

- 7-inch LCD screen, anti-glare.
- Integrated with the control of equipment including rearview camera, air conditioning, radio, etc.

Ergonomic Designs

- The safety armrest features a streamlined design and armrest function, providing a comfortable and fatigue-free support.
- The joystick, buttons, and scroll wheel are arranged according to ergonomics for comfortable operation.

Considerate Designs

- Considerate designs such as 12V power socket, cup holder, storage bag, etc., for convenient use by the operator.

SAFETY OPERATION

Visibility

- The reversing camera system and interior rearview mirror provide an ideal view behind the machine.
- Panoramic view design for front and sides to minimize unnecessary obstruction.

Multiple Protection

- Configure the reversing camera, interior rearview mirror, and boom rearview mirror; the new boom structure ensures that the operator can see the edge of the bucket from the normal position, providing a wide operating view.
- Equipped with a ROPS & FOPS cab, safety handrails, side window protective nets, operation safety bars, rotating beacon to ensure safety.
- Equipped with emergency unloading valve and escape window, practicing the concept of "life is the most important, and there is no price for life."

Safety Armrests

- Raising the safety armrest can prevent accidental operation.

Protective Net

- It prevents personnel injuries caused by splashing or falling stones, etc.

Rotating Beacon

- It always reminds people around to maintain a safe distance.

Escape Window

- Emergency exit.

INTELLIGENT CONTROL

One-click Startup

- It is available to eliminate the trouble of carrying the key. And a password can be set to ensure the safety of your equipment.

Display Screen

- Self-diagnosis and maintenance reminder function for display screen faults.

Travel Performance

- Ride Control option improves operation on rough terrain, enabling better load retention, increased productivity and greater operator comfort.

With Ride Control on

With Ride Control off

Self-leveling

- Equipped with a bucket self-leveling system for smooth operation and spill-free material handling.

Intelligent Anti-Stall

- Adopts power adaptive allocation technology for intelligent anti-stall.

EFFICIENT OPERATION

High Unloading Height

- The maximum hinge height reaches 3,130 mm, making truck loading easier.

Powerful

- Both the power and traction are strong benefiting from its powerful YANMAR engine and a low-speed and high-torque motor.
- Based on its vertical lifting structure, large breakout force was achieved through the combination between the excellent point design and strong thrust cylinder.

Efficient

- Configured with dual speeds, with a maximum speed of 19.7 km/h, achieving efficient transfer.

Pivot 360 Degree in Place

- It can pivot 360 degree in place benefiting from its compact structure, making it possible to work in confined spaces.

Quick Hitch

- Hydraulic quick hitch for fast attachment changes.

CONVENIENT MAINTENANCE

Ease of Maintenance

- The tailgate can be opened fully, and the mesh cover can be flipped up, allowing for easy access to all parts from the ground during routine maintenance.

Ease of Repair

- The entire cab can be flipped backward, providing enough spaces for inspecting and repairing components such as pumps, motors, and valves, making maintenance convenient.

VARIOUS ATTACHMENTS

Versatility

- Standard and high flows are available, making that various attachments can be used to meet different assignments, such as buckets, sweepers, snow blowers, cold planers, forks, forest mulchers, etc.
- The auxiliary quick-connect coupling features a self-depressurization function, allowing users to replace it under pressure with ease.

OVERALL DIMENSIONS

Overall Dimensions		SS210R
A	Maximum Overall Height	4,100 mm / 161.4 in
B	Bucket Pin Height at Maximum Lift	3,130 mm / 123.2 in
C	Clearance at Maximum Lift and Dump	2,365 mm / 93.1 in
L1	Reach at Maximum Lift and Dump	563 mm / 22.2 in
D	Ground Clearance	192 mm / 7.6 in
E	Wheelbase	1,130 mm / 44.5 in
F	Bumper Overhang Behind Rear Axle	1,028 mm / 40.5 in
R	Turning Radius from Center-Bucket	2,175 mm / 85.6 in
R1	Turning Radius from Center-Coupler	1,283 mm / 50.5 in
R2	Turning Radius from Center-Machine Rear	1,710 mm / 67.3 in
G1	Maximum Dump Angle	39 °
G2	Rollback Angle of Bucket on Ground	30 °
G3	Departure Angle	23°
L2	Length without Bucket	2,825 mm / 111.2 in
L	Length with Bucket on Ground	3,644 mm / 143.5 in
W1	Wheel Track	1,514 mm / 59.6 in
W2	Over the Tire Width	1,770 mm / 69.7 in
W	Over the Bucket Width	1,830 mm / 72 in
H	Height to Top of Cab	2,040 mm / 80.3 in

TECHNICAL SPECIFICATIONS

Performance		Power System	
Rated Operating Capacity	998 kg / 2,200 lb	Engine Model	4TNV98
Operating Weight	3,850 kg / 8,488 lb	Engine Speed	2,400 rpm
Bucket Capacity	0.4 m³ / 0.5 yd³	Rated Power	50.2 kW / 67.3 hp
Tipping Load	1,996 kg / 4,400 lb	Peak Torque	238N.m @1,550 rpm
Breakout Force, Tilt Cylinder	25.5 kN	Displacement	3.319 L / 203 in³
Breakout Force, Boom	20 kN	Bore x Stroke	φ98X110 mm / 3.9x4.3 in
Lift Geometry	Radial	Aspiration	Naturally Aspirated
One Speed	13.3 km/h / 8.2 mph	Emissions	EU Stage III
Two Speed	19.7 km/h / 12.2 mph		
Tire Size	10-16.5 10PR	Capacity	
		Battery Capacity	140 Ah
		Hydraulic Tank	35 L
		Hydraulic System	65 L
